The capacity chart shows the maximum capacity for the specific machine. The testing has been conducted with standard equipment. Therefore, the use of special tools, can result in a different outcome. Always start the machine at the lowest speed. Increase the speed subsequently, taking the product being mixed into account.

Symbols explainer - Recommened actions:

+ – Apply scraper, for the best and most efficient result
□ – Always make sure the ingredients are room temperature/soft. If not, this can damage the tools.
✿ – Recommended to work on low speed.
○ – Recommended not to go above medium speed.
AR = Absorption Ratio (moisture in % of dry matter)
